

å Allergan

Environmental Health and Safety Policy

Introduction It is the policy of Allergan to assure our business practices enhance the welfare of our customers, employees, and the communities in which we operate. To execute this policy, Allergan will strive to achieve the following Environmental Health and Safety Goals:

- Prevention**
- Prevent illness or injury to our employees.
 - Prevent adverse environmental impact.
 - Prepare and practice effective Environmental Health and Safety contingency plans.
 - Minimize, and eliminate where possible, the use of hazardous materials.
-

- Development & Design**
- Develop manufacturing processes and products to minimize their environmental effects and emphasize recyclability and reuse.
-

- Compliance**
- Audit to assure compliance with regulatory and corporate requirements and objectives.
 - Work in partnership with Environmental Health and Safety regulatory agencies.
-

- Good Citizenship**
- Promptly respond and strive to resolve employee or community Environmental Health and Safety issues.
 - Conserve natural resources.
 - Foster business agreements with organizations with effective Environmental Health and Safety programs.
 - Become Environmental Health and Safety leaders in the community.
-

- Communication**
- Communicate our Environmental Health and Safety performance to interested stockholders including employees, customers, communities, and shareholders.
-

- Continuous Improvement**
- Continue to improve our Environmental Health and Safety performance.
 - Evaluate and initiate new ventures and alliances with these goals in mind.
-
