

# CLINIQUE MEDICAL

Advances in Skin Care by CLINIQUE® and ALLERGAN®

## Products Designed For Skin's Unique Needs Before And After In-Office Non-Surgical Cosmetic Procedures

CLINIQUE MEDICAL is a new skin care line available only in skin care physicians' offices from Allergan, Inc., the #1 global medical aesthetics company, and Clinique, the #1 prestige cosmetics brand in the United States. The products in the CLINIQUE MEDICAL skin care line work together to help prepare the skin for select procedures – Intense Pulsed Light (IPL) or fractionated laser treatments, chemical peels such as 30% Trichloroacetic Acid (TCA) peels, and microdermabrasion – and to **support the healing process** by helping to manage post-procedure visible excess redness and irritation and encourage even skin tone. The cohesive at-home skin care routine also helps **complement the benefits of procedures** and helps enhance skin's resilience to the visible signs of aging. All products in the CLINIQUE MEDICAL skin care line are Allergy Tested, 100% Fragrance Free and contain no preservatives.

The CLINIQUE MEDICAL products can be purchased individually or in the CLINIQUE MEDICAL Optimizing Regimen kit which consists of a Probiotic Cleanser, Skin Conditioning Treatment, Recovery Week Complex, Optimizing Treatment Cream and Daily SPF 38.

<b>Probiotic Cleanser</b> <i>Pre/Post-Procedure Formula</i>	<i>Pre-procedure:</i> Helps thoroughly remove debris and stubborn makeup to aid treatment penetration		<i>Post-procedure:</i> Helps maintain skin's barrier with natural lipids to help support its protective capacity and helps limit risk of unintended effects of procedures		<i>Pre/Post-procedure:</i> Helps skin keep its natural barrier and replenishes lipids to support the healing process

USE: Apply daily, prior to sun exposure. May be used as part of daily skin care					

The CLINIQUE MEDICAL Optimizing Regimen kit includes all of the above products for the suggested retail price of \$235.00.

**Clinical Data** – Two randomized, double-blind controlled studies were conducted to demonstrate the effectiveness of the **Optimizing Regimen kit** on the outcome of 30% TCA peel (n=28) and IPL treatment (n=29). After 12-weeks of use versus control, **CLINIQUE MEDICAL** significantly reduced post-procedure symptoms and significantly improved results of both 30% TCA peels and IPL treatments.<sup>1</sup>

**CLINIQUE MEDICAL Dry Spot Balm** – **CLINIQUE MEDICAL** additionally offers a stand-alone product, Dry Spot Balm, an ultra-hydrating lip and facial spot balm designed to alleviate severe dryness and the associated discomfort related to some prescription medications (\$24.00 suggested retail price for a 15ml. tube). A calming, concentrated marine botanical extract helps reduce the appearance of redness, irritation and dryness. In addition, a six-lipid complex and barrier-enhancing ingredients provide building blocks that help strengthen skin's barrier to defend against extreme environmental conditions.

**CLINIQUE MEDICAL** is available exclusively in skin care physicians' offices nationwide. To learn more please visit [www.CliniqueMedical.com](http://www.CliniqueMedical.com).
